3. Significance

In the year 1624, the Dutch were the first natives to settle near the Hudson River. Later, after two years, they colonized New Amsterdam which was located over the Manhattan Island. However, around the year 1664, the British ruled the area and soon named the city as New York. It then played a very vital role in strategic and political mutinies during the American Revolution among the 13 original colonies. Many immigrants traced the path of Ellis Island after landing to New York for becoming to gain U.S. citizenship. A trading port, New York is known to have a number of immigrants from different countries across the globe. Thus, the city experiences diversity in the languages spoken. From the gilded age, that is from 1890s until the World War I, many massive structures are built that deeply signifies the love for the art by the city lovers. The buildings are made up of colorful stones that bring a majestic look to the city at night. A few of such structures are The Public Library, Grand Central Station and the Metropolitan Museum. New York is a colorful city with brownstone residential neighborhoods along its border. Some of the major landmarks that differentiate New York as a place for tourists are the Empire State Building, the Brooklyn Bridge and the Statue of Liberty. The first capital after the ratification of the U.S. Constitution was New York in the year 1788. George Washington became the first President of the nation. After the alliance of France and U.S. during the American Revolution, France gifted the Statue of Liberty for dedicating the democracy and freedom it received. 26th of July, 1788 is the date of Statehood for New York. With a population of approximately 20 hundred thousand, Albany is its state capital. New York is also called as Empire Estate and missions for Excelsior.

4. History

New York was explored during the early ages of the 16th century. Giovanni de Verrazzano from Italy was among the first who settled there in search of a route through Asia. The first New Yorkers were Algonquin folks who fished, hunted and farmed across the Hudson and the Delaware rivers. The Dutch West India Company made few families to travel to the Nutten Island for work and living. Later, in the year 1626, Manhattan Island was sold to Peter Minuit, governor general of the Nutten Island. The city quickly grew as with trade goods such as cloth, farming equipment and shell beads. When the British colonized the Dutch and the Nutten Island (New Amsterdam), they called it as New York. Thus, it was not until 1760, the community became the second largest city that put Boston behind. It served as a capital of the United States of America up until the year 1790 from the year 1785. The amenities in the community grew better during the 18th century. In the year 1725, The New York Gazette, the first newspaper was published. Seven years later, the city opened the first ever theater with the establishment of Kings College (now known as Columbia University) in the year 1754.

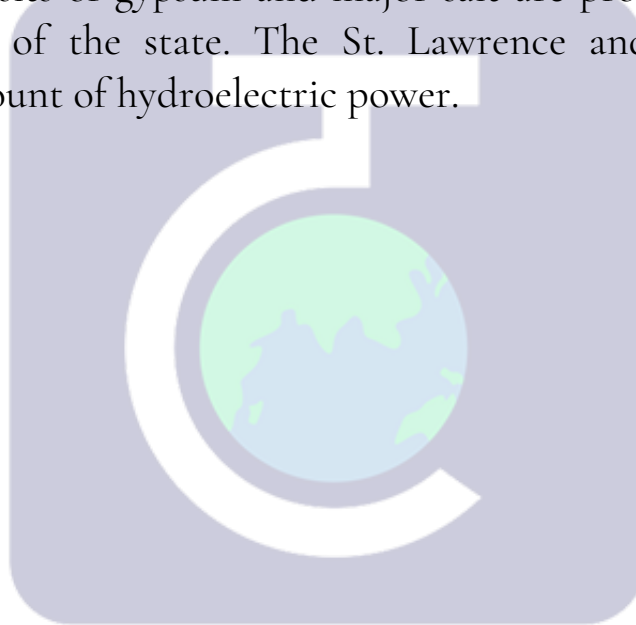

5. Cultural identity

New York has its unique identity hidden in varied cultures. A number of rollers and tycoons along with immigrants across the globe have literally built the city from the day it was established. Therefore, it is very difficult to point one culture that the entire community shares. Different sub-cultures thrive in each sector of the city. Moreover, the ethnic cultural identity abounds through the neighborhood cities such as Little Italy, Chinatown, Astoria, and Little India. The lesbian and gay lifestyles predominantly traces through Chelsea and Greenwich. Nothing can shock or surprise the New Yorkers. The city has diverse characteristics and everything is right at their fingertips. The city has a lot to offer to each of its citizens, immigrants or visitors. Hence, there is hardly any chance to experience the overwhelming choice it provides in one visit. The economy keeps churning 24 hours a day; thus, it is called as a city that never sleeps, each neighborhood replicates its own culture and identity. The cultural resources have widely protected the cultural heritage of New York. These resources include archaeological buildings, objects, sites, structures and everything that will dignify the culture that the city has preserved over the years. The Chrysler Building, the Whitney Museum of American Art and the Lever House Building work as modern art with ancient architecture. The other structures that add to the cultural resources of the New York City are the religious properties, historical figures, cemeteries and commemorative properties.

6. Natural resources

The natural resources of New York comprises mainly of varieties in minerals, fertile soil and abundant supplies of water. Industrial garnets that are used in sandpaper and watches along with zinc, talc and lead can be found in St. Lawrence Lowland and Adirondacks. The western region of the state supplies natural gas and petroleum. Sandstones, limestone and granite are treasured resources here. Deposits of gypsum and major salt are provided by the western and central regions of the state. The St. Lawrence and the Niagara River generates a great amount of hydroelectric power.
